DETAILED ACTION

Change of examiner

1. Note the change of Examiner in the present application. The Art Unit number remains the same.

Response to Amendment

2. The amendment of February 17, 2004 overcomes all the rejections of record.

Upon review, however, the following new grounds of rejection are seen necessitated.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1, 2, 5, 8, 11 and 14-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Formula I in claim 1 contains a 5-membered heterocyclic ring "A" which is then substituted on the N atom by a -X-Y-Z-G group. The definition of the heterocyclic "A" ring below the structural formula also contains the -X-Y-Z-G substituent. This is confusing since the definition of the "A" ring should be of the heterocyclic ring itself and not include substituents already in the generic formula. Correction and/or clarification is requested.

Obviousness-type Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

- 6. Claims 1, 2, 5, 8, 11 and 14-41 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of copending Applications No. 10/423,671 and 10/423,779. Although the conflicting claims are not identical, they are not patentably distinct from each other because overlapping formulas are involved. The species of each application anticipate the formulas of the other applications. Clarification of any distinction in the subject matter of the three application is requested. In the absence thereof, amendment and/or presentation of terminal disclaimers are required.
- 7. This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
